

Windows SimpleServer Setup

- 1) Download and install git with default options: <https://git-scm.com/>
- 2) Download and install python 2.7.x <https://www.python.org/downloads/>
- 3) Download todo-mvc <http://todomvc.com/>
- 4) Open git bash and type the following commands:
 - a) `echo 'export PATH="$PATH:/c/Python27"' > .bashrc`
 - b) `source ~/.bashrc`
- 5) In git bash, navigate to the directory where your todo-mvc app is located
- 6) `python -m SimpleHTTPServer`
- 7) Open chrome and goto <http://localhost:8000>
- 8) When done with the server, go back to git bash and press Ctrl-C to kill the server.
